Download instructions

Repository name: ClubManagement_Java

Repository address: https://github.com/mail4rayo/ClubManagement_Java/

Download executable .jar file:

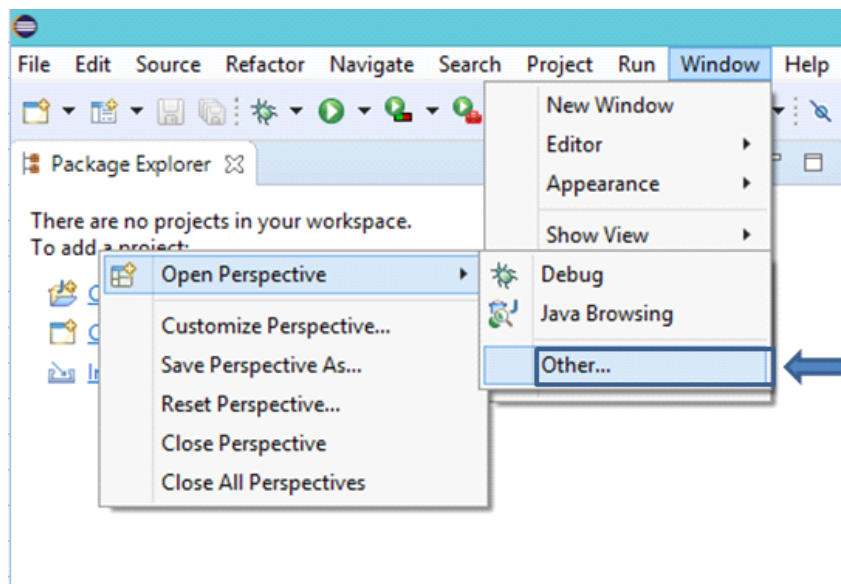

- File ClubManagement_Java.jar is located in the repository folder, and can be downloaded from there.
- Make sure that Java is installed on the machine, so that .jar extension is recognized.
- Open file from the location where it was saved.
- The Program should open with the window looking like this:

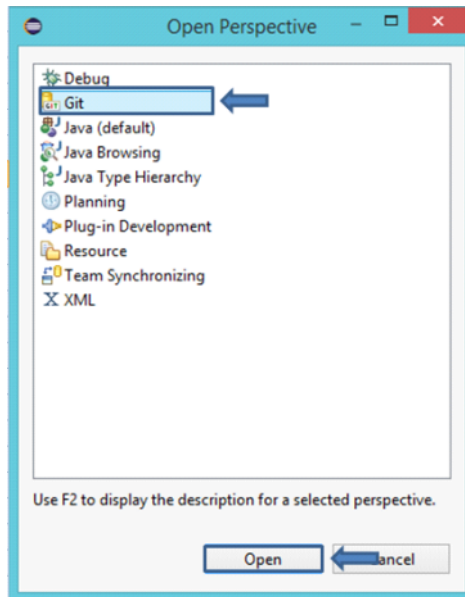

Follow **USER GUIDE** to learn how to operate the program.

Download with Eclipse:

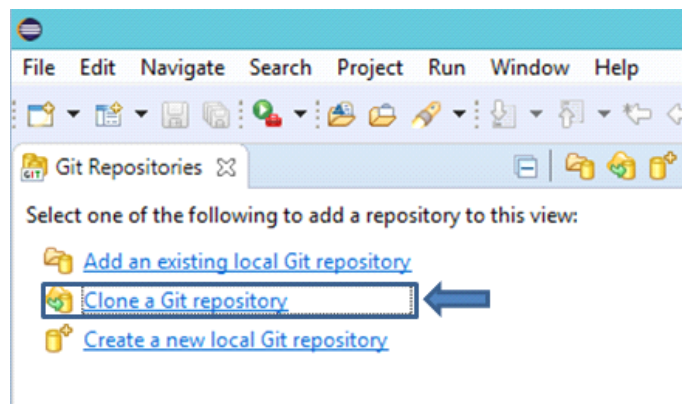

Open Eclipse and go to: Window-->Perspective-->Open perspective-->Other...

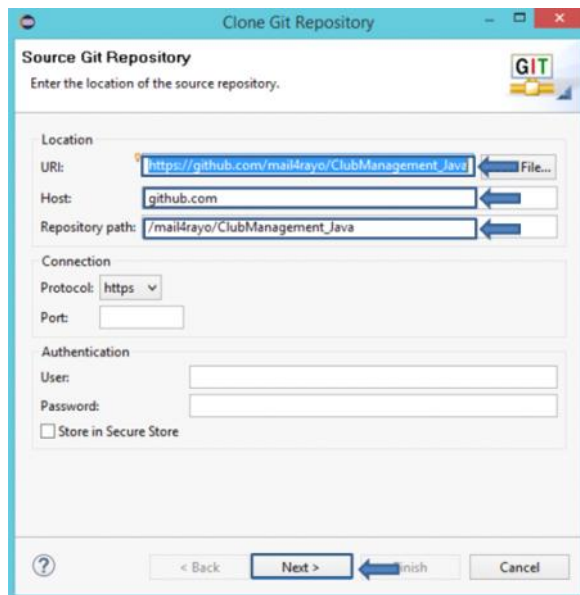

Select Git, and press Open.

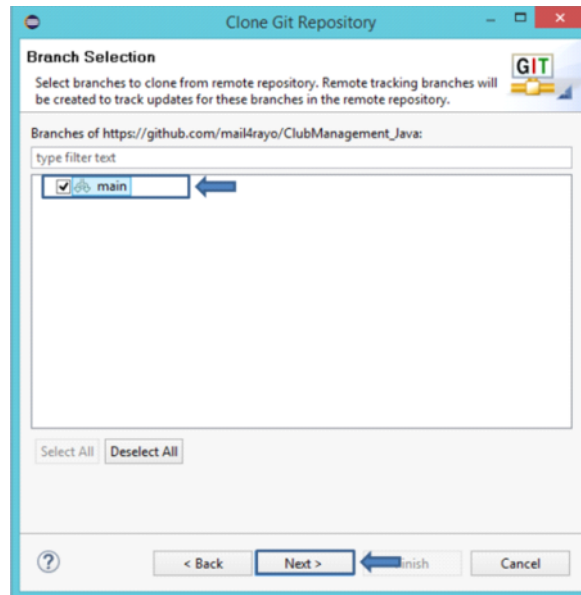

Click on Clone a Git repository

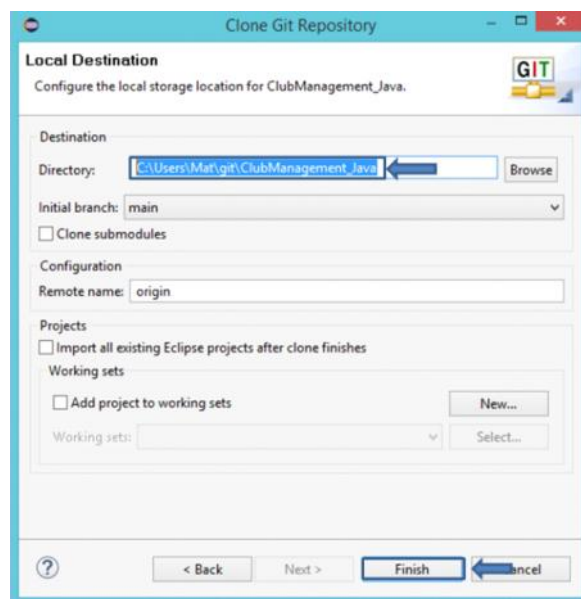

Fill out the repository information with the URL: https://github.com/mail4rayo/ClubManagement_Java/. The rest of the information should fill automatically. Click Next.

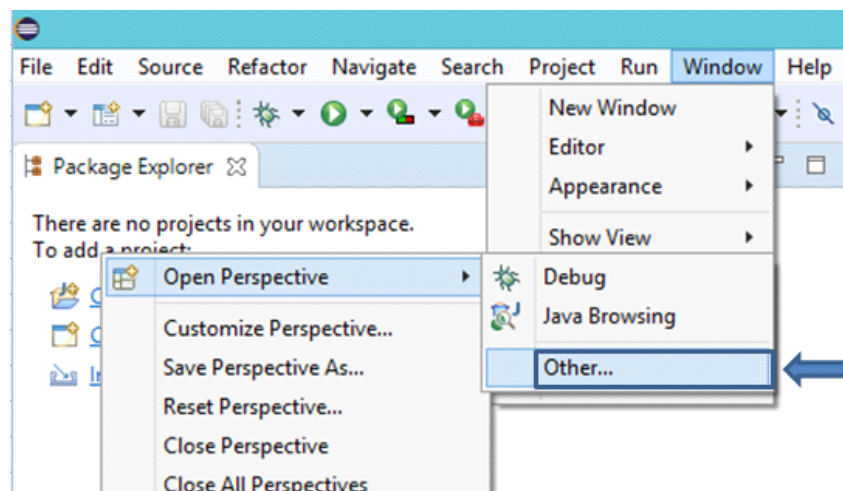

Main branch should be selected. Click Next.

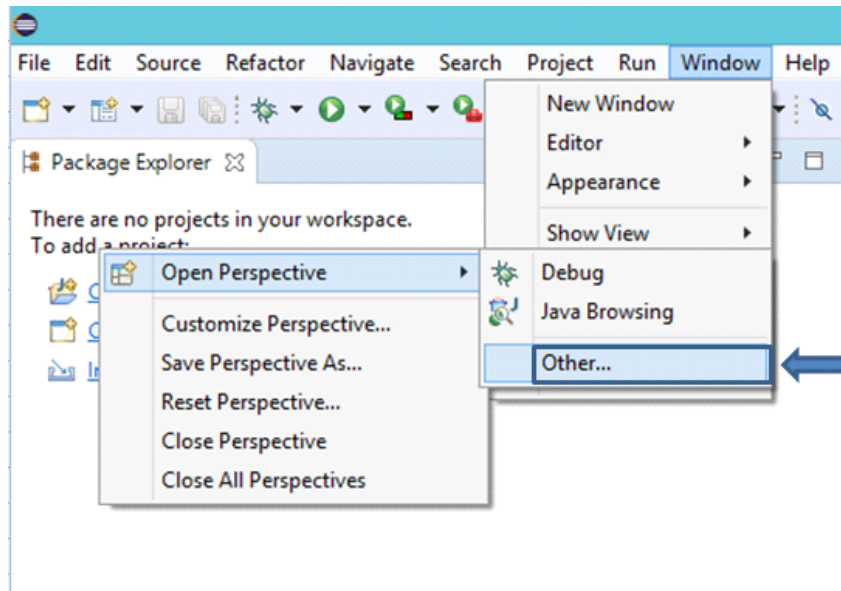

Insert Directory name to store local version of the project.
This can be any location.
Click Finish, this will create local copy of the Github repository.

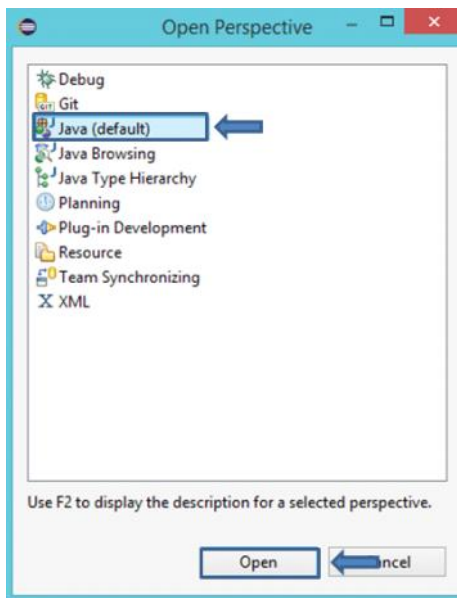

Switch to default Java perspective. Go to: Window-->Perspective -->Open perspective -->Other...

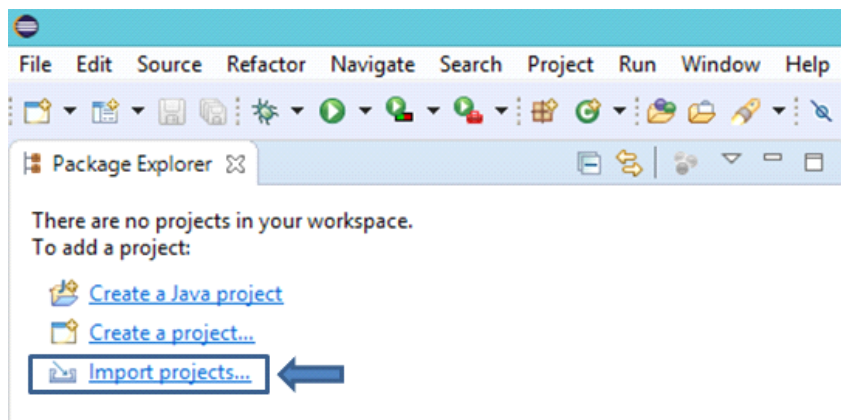

Click on Java (default) and click Open.

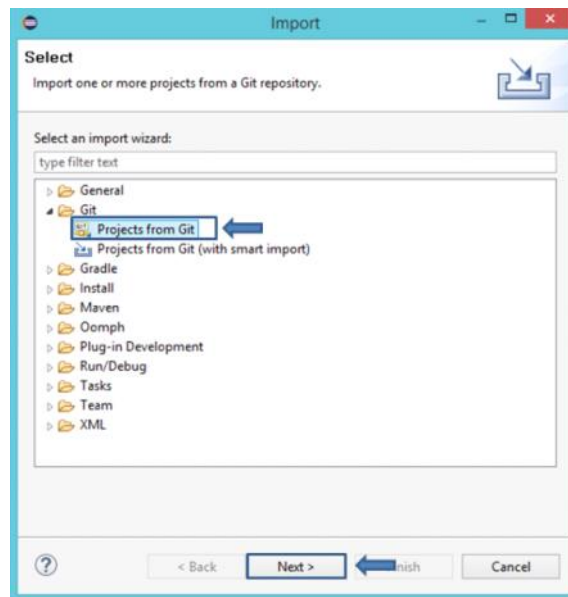

Click import projects...

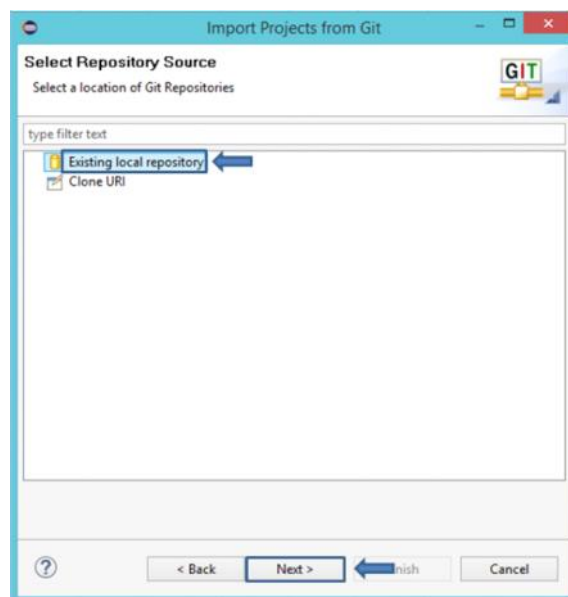

Open Git and click on Projects from Git. Click Next.

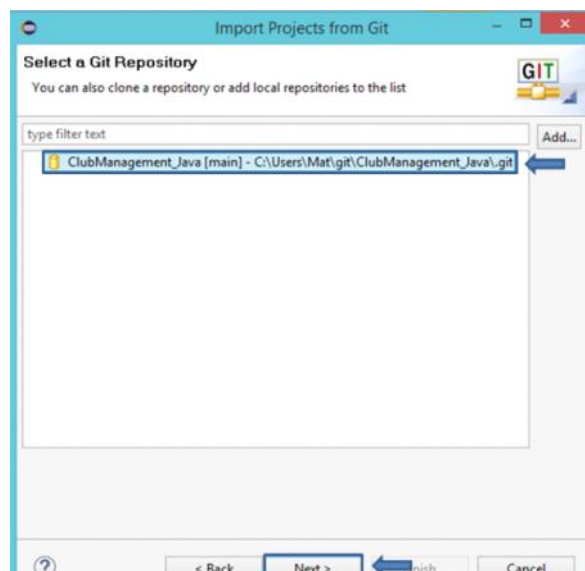

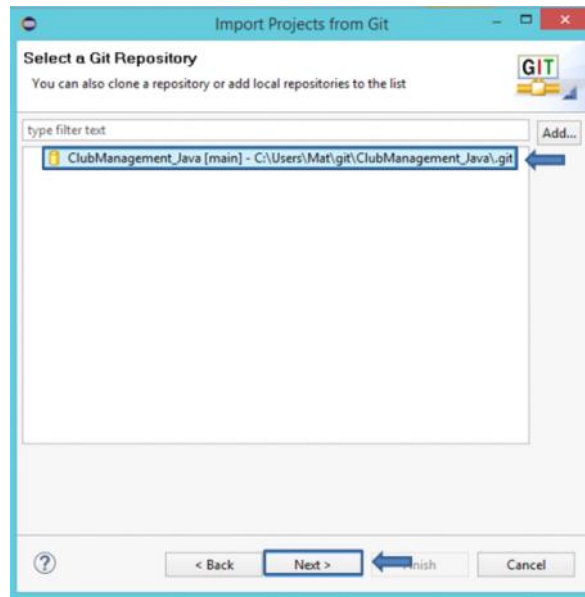

Select Existing Local repository and click Next.

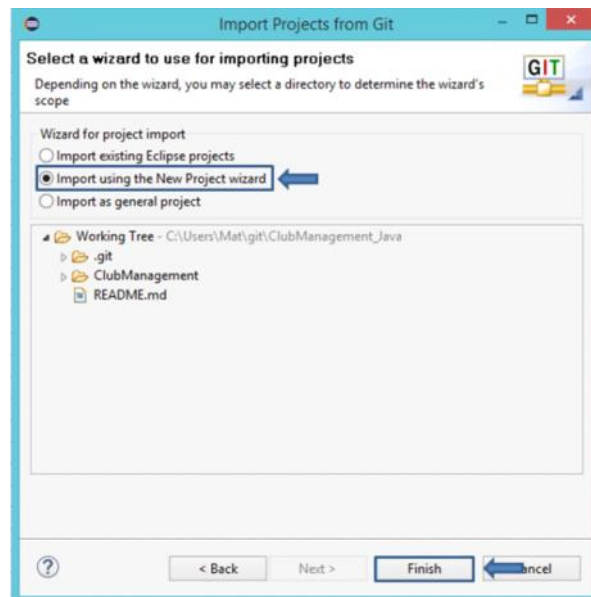

Select the name of the project and click Next:

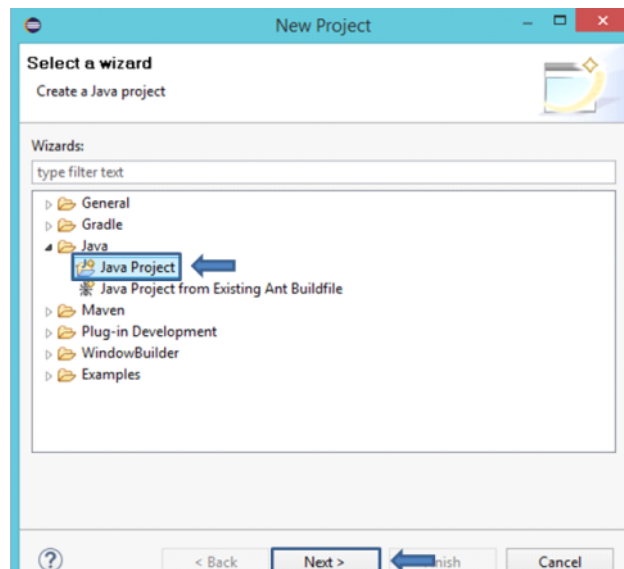

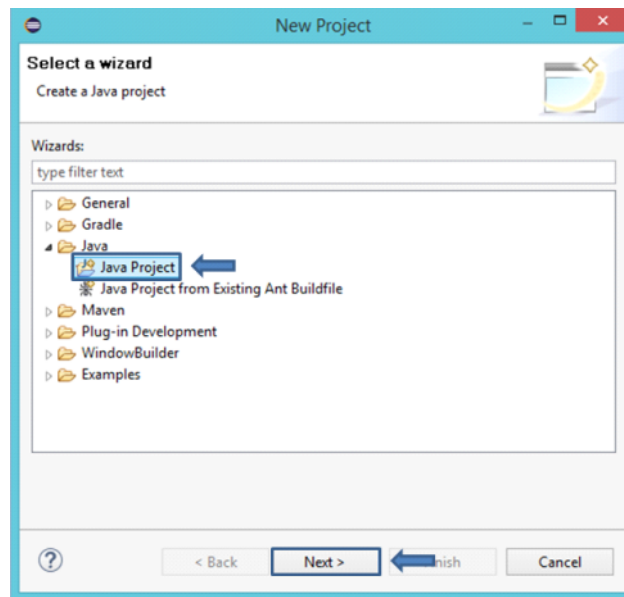

Select Import using the New Project wizard. Click Finish.

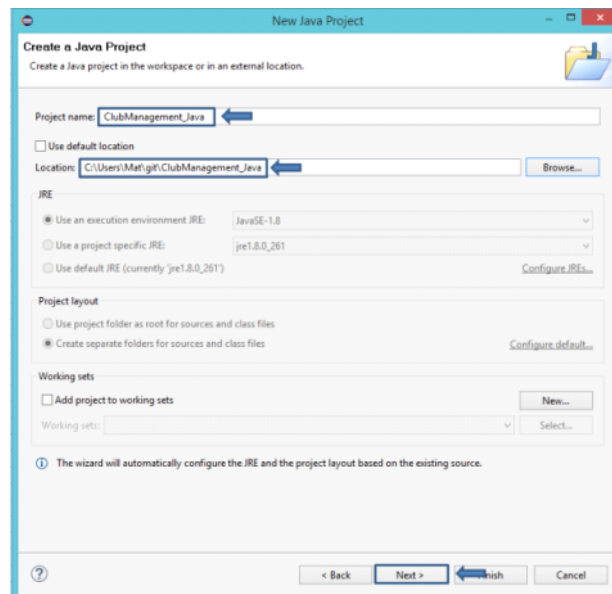

Click Java and then Java Project. Click Next.

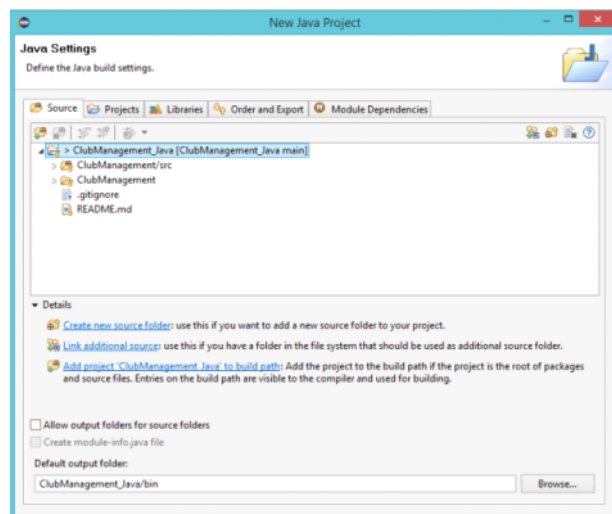

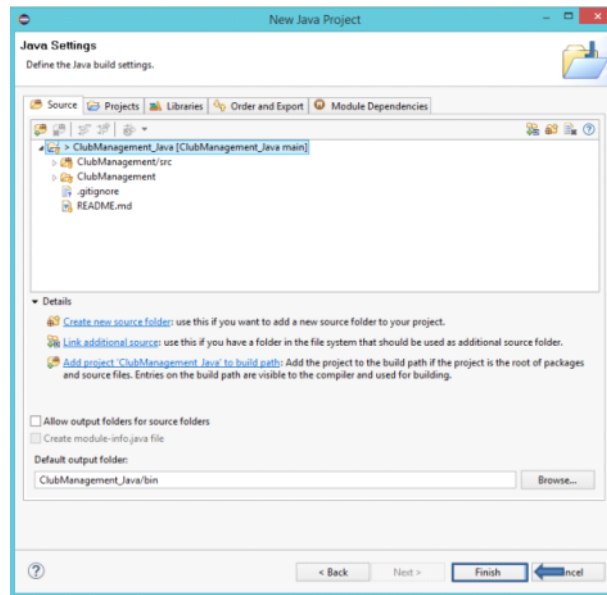

Uncheck Use default location and select location of the local repository directory, created earlier. Click Next or Finish. Enter project name: ClubManagement_Java.

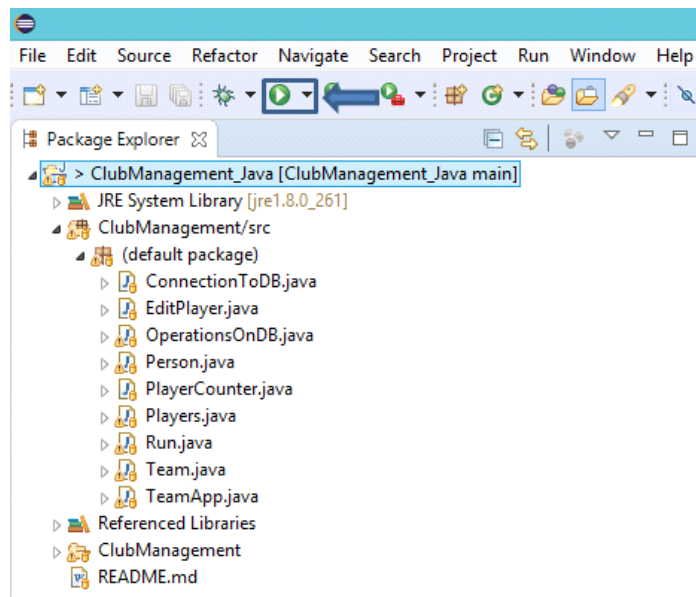

Note: Project name has to be the same as the folder location name.

If clicked Next, the following window will appear. Click Finish.

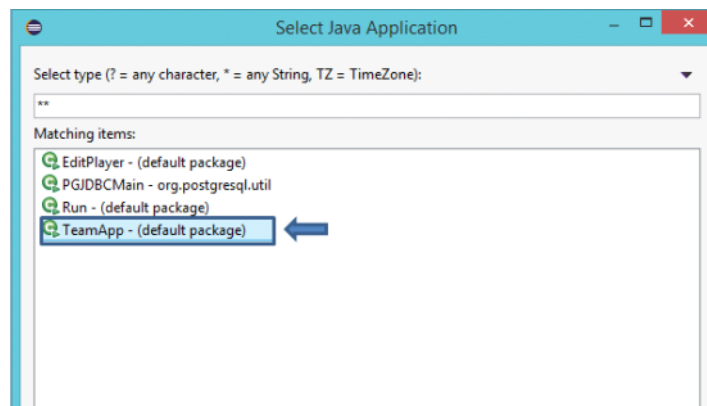

Project should be loaded with all the files required to run the project.

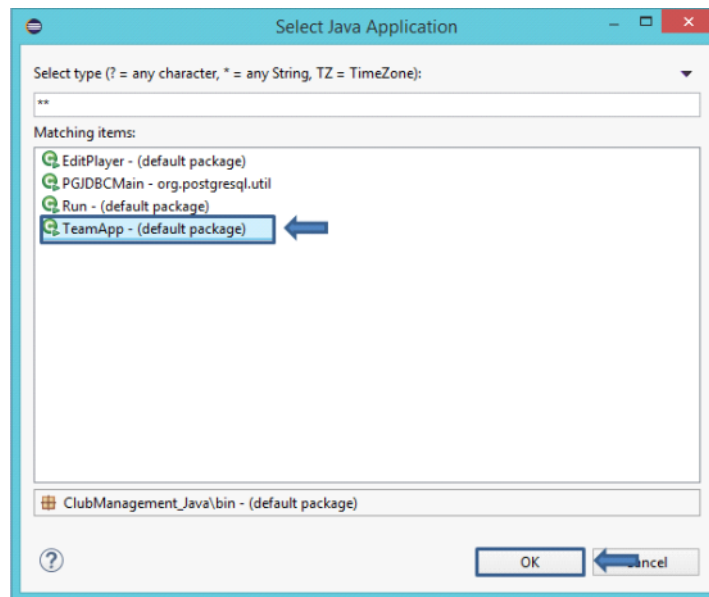

Click on Run button:

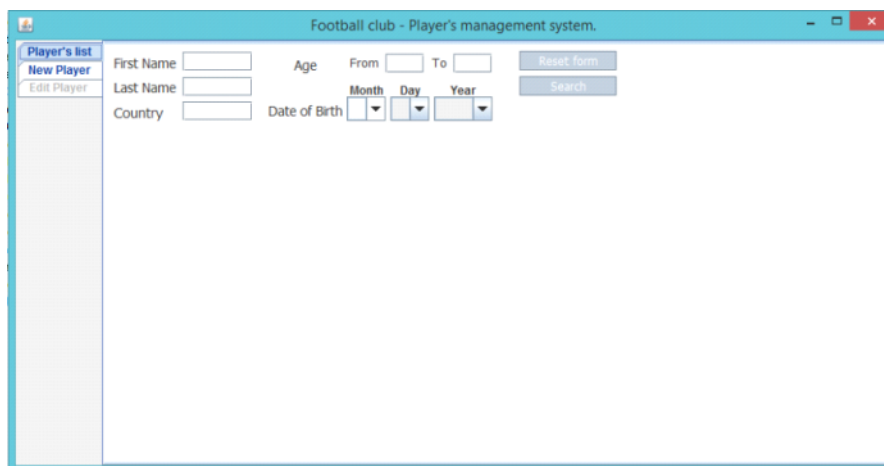

Select TeamApp - (default package) and click OK.

The Program should open with the window looking like this:

Follow **USER GUIDE** to learn how to operate the program.

Good luck and thank you for downloading my program.
